CERTIFICATE OF COMPLETION

This is presented to

NIKHIL AJEET SINGH

From Bhavan's College Andheri(W) studying in
T.Y.B.SC.CS for building & completing our
Business Website according to our vision &
requirements in a short span of time.

Preeti R Jain

Proprietor

This document is computer attested

ACKNOWLEDGEMENT

I would like to express my sincere gratitude towards the Computer Science Department of Bhavan's College.

After months of hard work, finally I am very happy to present my Sem 5 Project. The Project making was full of new experiences and learning and difficult one too. Though a difficult job it was made simpler by the timely guidance received, which helped me greatly in the completion of my project. But it wouldn't be right to do so without thanking to those who have helped me in converting our thought into reality. So, I would like to take full advantage of this opportunity to thank each and every person who has helped me throughout the completion of our project.

I am obliged to my parents & family members who always support me greatly and encouraged me in each and every step. I give my special thanks and sincere gratitude towards the Principal Dr. Zarine Bhathena and Head of Department (Computer Science) Prof. Mrs. Krupa Balsara-Kamdar.

I owe my sincere thanks to our Project guide Mrs Krupa Balsara-Kamdar for her constant support and encouragement without which the successful completion of this project would have been impossible. They have been instrumental for making me concentrate and focus my effort in this project. And last but not the least the entire college staff specially Mr. Prathamesh N. Rane.

I would like to give thanks to my friends for helping me in my project. Finally, I would like to thank each and every individual who was directly or indirectly contributing for this project.

-Thank you

1.

PRELIMINARY INVESTIGATION

1.1 Organizational Overview

Navkar Fittings Company is a leading manufacturer of all types of Pipe Fittings viz. M.S. Pipe Fittings, S.S. Pipe Fittings, etc, catering to the industries like Pharma, Oil & Gas, Manufacturing, Chemical and Dairy Industries.

Our dedication and commitment towards the quality of our products, maintenance of our plant, higher productivity and trained and skilled Human Resources has helped to us sustain for more than 15 years in the industry.

Our vision is to become the leading company in S.S & Pipe-Fitting products and related businesses. Navkar is committed to provide quality products to its customers as per standard and best suited to local environment at affordable price.

1.2 Description of the existing system

- Deployed at <http://www.navkarengg.com/>
- Made in php + html +css +js
- No database involved
- Completely static

1.3 Limitation of the present system.

- Bad UI
- Static website
- Old look
- No interactivity with users
- Redundant products are still listed
- Not at all organized
- automated mailing doesn't work

1.4 The proposed system

- better UI
- More interactive surface
- faster loading
- Admin panel to update products and website info
- To collect customer information and interests on products
- automated mailing system

Advantages of proposed system

- Admin will be able to add /update/delete products as per requirement
- Admin will be able to update website info as per requirement
- Better UI and interactivity will bring in more customers
- Customers can place requests easily
- Website will be organized and future updates will be easy
- customer and admin will be notified through mailing system

Number of modules in the proposed system

- Admin
- Customer
- Product
- Request
- Email (optional module)

1.5 Requirements and FEASIBILITY STUDY

Technical Feasibility

Hardware Requirements

1. Intel i3 or higher.
2. 1 GB RAM.
3. >1 GB Hard-disk space.

Software Requirements

4. Windows 7 or higher, any Linux distro
5. Google Chrome or Firefox Browser.

Operational Feasibility: This project is operationally feasible, easy to handle with basic input, the user interface is easily interact by user. The Operation of adding, updating, deleting is easy to handle. The database connectivity is provided by Developer.

Economic Feasibility: this project can be deployed on any webhosting platform supporting php and mysql. First time deployment will be done for free by developer after current domain expires.

1.6 Gantt Chart

2.

SYSTEM ANALYSIS

2.1 Fact Finding Techniques (Questionnaire, Sample Reports, Forms...)

Questionnaire

- Do you have any existing website?
- . What should be the name of the website?
- Do you have any color scheme preferences for your website?
- Does the admin need to login?
- What is the basic information required for the customer to register into the website?
- Is it necessary for the customers to login to place an request?
- How do customers place a customized request?

2.2 EVENT TABLE:

TRIGGER:

Trigger an occurrence that tells the system that has occurred, either the arrival of data needing or of a point in time

SOURCE:

An external agent or actor that supplies data to the system

ACTIVITY:

Behavior that the system performs when an event occurs

RESPONSE:

An output produced by the system that goes to a destination.

DESTINATION:

An external agent or actor that receives data from the system

Table: 1. Login/Register Use Case

Use Case Name	Log-in/Register
Summary/Description	Use case depicting how an Admin or Customer would login.
Actors	Admin and Customer
Pre-Conditions	Log-in ID must be present in Login table for both Customer and Admin
Descriptions	Admin or Customer will have to login to land on their respective home pages. From here they can perform their respective actions.
Exception	No ID present in the Login table, which will give them an error
Trigger	Trigger is activated when a new customer registers and this trigger notifies respective customer and admin through mail
Post-Condition	Admin and Customer successfully Login.

Table: 2. Customer Use Case

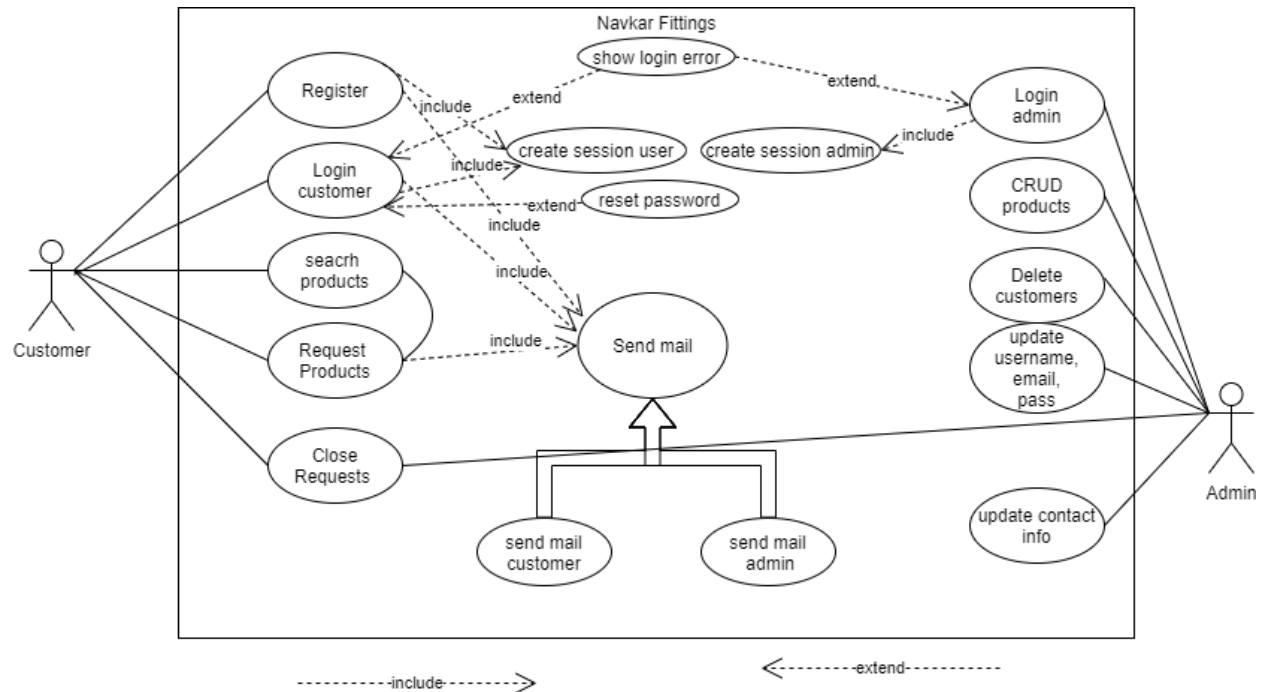

Use Case Name	Customer Use Case
Summary/Description	Use case depicting how an Customer will log-in and then perform his respective tasks from the web application
Actors	Customer and Admin
Pre-Conditions	Customer Login ID must be present in the Login table enabling Customer to login
Descriptions	Once the Customer has logged in to the system, he can perform various tasks such as, Placing an Request, View Placed Requests, view contact info, view products, search products, logout
Exception	Customer ID is not present
Trigger	Trigger is activated when a new Request is made and this trigger notifies respective customer and admin through mail
Post-Condition	Customer is able to successfully log-in and perform all the actions he is authorized to.

Table: 3 Admin Use Case

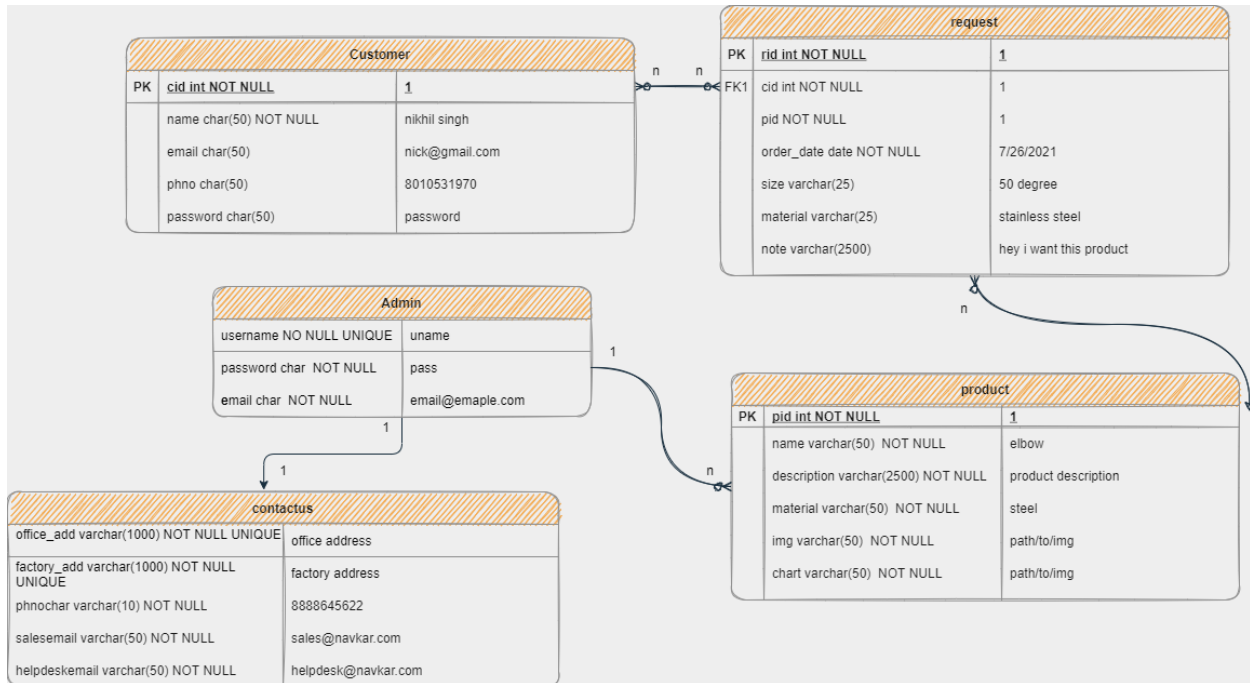

Use Case Name	Admin Use Case
Summary/Description	Use case depicting how a system admin will be able to log-in and perform his respective tasks in the web application
Actors	Admin
Pre-Conditions	Person trying to log-in must have administrative privileges.
Descriptions	Admin holds all the rights the system has to offer. He/She can create view, update delete products. Delete existing customers, update admin username ,email and password , and update contact info of the site

Exception	Person trying to log-in does not have administrator privileges.
Post-Condition	Admin is successfully able to log-in and perform tasks.

4.2 TABLES WITH ATTRIBUTES AND CONSTRAINTS

Customer

Table 1: Customer

Field Name	Data Type	Constraint	Description
cid	int	PRIMARY KEY	Id of customer
name	varchar(15)	NOT NULL	Name of customer
email	varchar(50)	NOT NULL	Email of customer
phno	varchar(10)	NOT NULL	Contact no of customer
password	varchar(10)	NOT NULL	Password of Customer

Admin

Table 2: Admin

Field Name	Data Type	Constraint	Description
username	varchar(10)	NOT NULL UNIQUE	Name of Admin
email	varchar(50)	NOT NULL	Email of Admin
password	varchar(10)	NOT NULL	Password of Admin

Contactus

Table 2: Contact us

Field Name	Data Type	Constraint	Description
Office_add	Varchar(1000)	NOT NULL	Office address
factory_add	Varchar(1000)	NOT NULL	Factory address

phno	varchar(10)	NOT NULL	Phone number
salesemail	varchar(50)	NOT NULL	Sales email
helpdeskemail	varchar(50)	NOT NULL	Help Desk email

Products

Table 3: Products

Field Name	Data Type	Constraint	Description
pid	int	PRIMARY KEY	Id of Product
name	varchar(25)	NOT NULL	Name of Product
description	varchar (2500)	NOT NULL	Details of Product
category	varchar(50)	NOT NULL	Category of Product
material	varchar(10)	NOT NULL	Type of Material Selected
Img	varchar(50)		Image path
chart	varchar(50)		Chart path

Requests

Table 4: Requests

Field Name	Data Type	Constraint	Description
rid	int	PRIMARY KEY	Id of request
pid	int	NOT NULL	Id of Product
cid	int	NOT NULL	Id of Customer
note	varchar (2500)		Note to seller
size	varchar(25)		Size of Product Requested

Request_date	Date	NOT NULL	Date of Request
material	varchar(25)		Type of material Selected

4.3 Program Description

Some important codes

Functions.php

(Functions for redirect verifying sessions and mailing code)

```
<?php
function verifysession(){

    if(isset($_SESSION["cid"]))
    {
        return true;
    }
    else{
        return false;
    }
}
function verifysessionadmin(){
    if(isset($_SESSION["name"]))
    {
        return true;
    }
    else{
        return false;
    }
}
function Redirect($url, $permanent = false)
{
    /* if (headers_sent() === false)
    {
        header('Location: ' . $url, true, ($permanent === true) ? 301 : 302);
    }
    */
}
```

```

    echo("<script>location.href = '$url';</script>");
    exit();
}
function sendmail($to,$subject,$content){
    require ('smtp/PHPMailerAutoload.php');
    $mail = new PHPMailer();

    try {
        //Server settings
        //$mail->SMTPDebug = SMTP::DEBUG_SERVER;           //Enable verbose debug output
        $mail->isSMTP();                                   //Send using SMTP
        $mail->Host    = 'smtp.gmail.com';                 //Set the SMTP server to send through
        $mail->SMTPAuth = true;                             //Enable SMTP authentication
        //$mail->SMTPDebug=3;
        $mail->Username = 'somemail@gmail.com';            //SMTP username

ADMIN.PHP

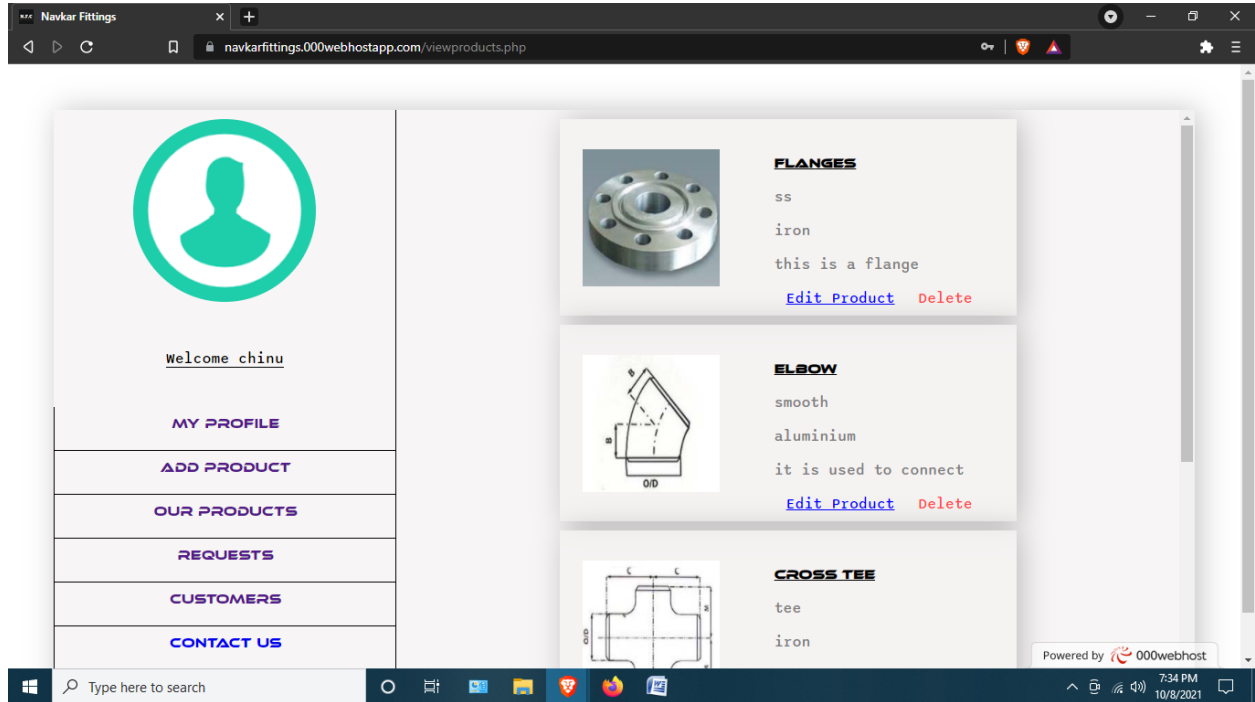

The screenshot shows the Admin PHP interface. On the left, there is a sidebar with a user profile icon and a list of menu items: **MY PROFILE**, **ADD PRODUCT**, **OUR PRODUCTS**, **REQUESTS**, **CUSTOMERS**, **CONTACT US**, and **LOGOUT**. The main content area displays a form to update user details. The form includes fields for **username** (filled with 'chinu'), **email** (filled with 'chinujain2@gmail.com'), and **password** (masked with '****'). There is an **Update** button below the fields. The interface is powered by 000webhost.

ADDPRODUCT.PHP

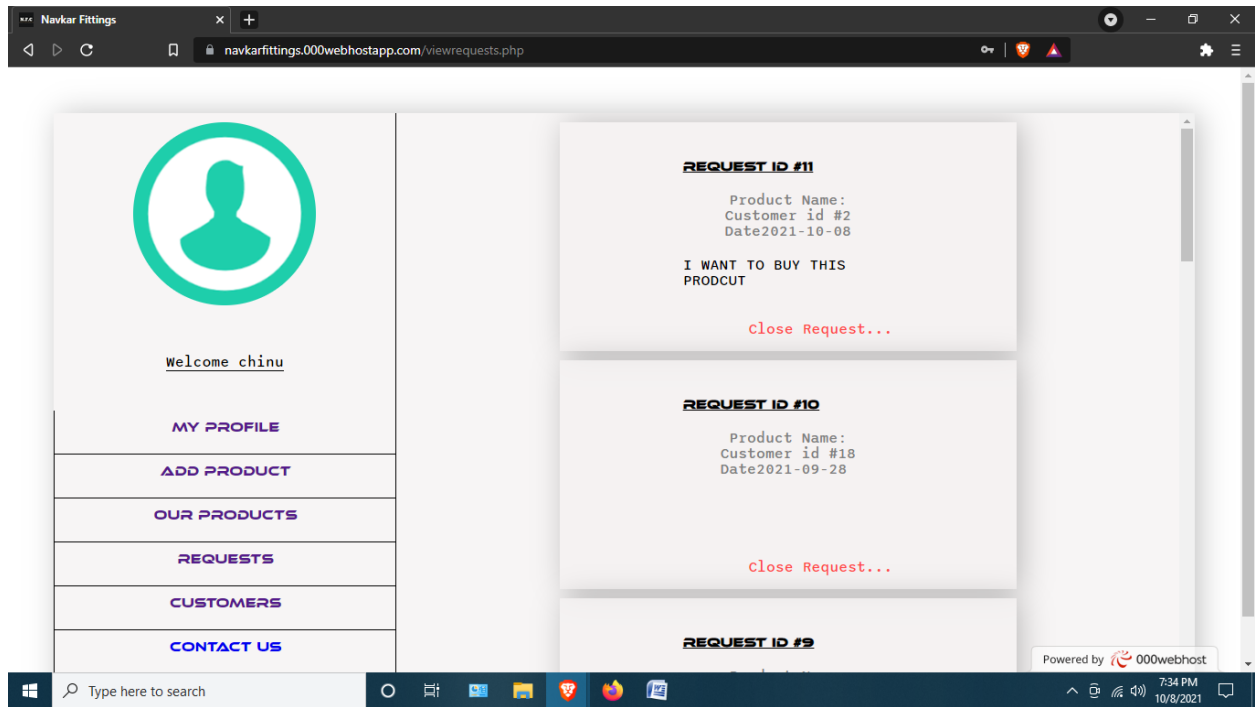

The screenshot shows the Add Product PHP interface. On the left, there is a sidebar with a user profile icon and a list of menu items: **MY PROFILE**, **ADD PRODUCT**, **OUR PRODUCTS**, **REQUESTS**, **CUSTOMERS**, **CONTACT US**, and **LOGOUT**. The main content area displays a form to add a new product. The form includes fields for **Product name**, **description**, **category**, and **Product material**. There is an **Image** field with a **Choose File** button and a **No file chosen** message. There is a **submit** button below the fields. The interface is powered by 000webhost.

ON PRODUCT REQUEST

5. FUTURE SCOPE

- A chart will be added to all products ,with the images of the product the current part has been commented out on client request
- A live dm feature will be added for sales team
- The project will be deployed on the new domain of the firm

CONCLUSION

- An attempt is made in all its earnest towards the successful completion of the project. This system was verified with valid as well as with invalid data.
- The system is made on PHP and has a well defined gui , the customer module is also responsive and fit for any device
- The project has been open sourced at <https://github.com/codewithnick/navkar-fittings-and-co> with client consent although , this repo might be privatized later.
- The project has been deployed for anyone interested in testing at <https://navkarfittings.000webhostapp.com/> with client consent although , this link might be down later.
